

11.03 Reciprocal Power Functions

Concept summary and key formulas

Key ideas

This subsection focuses on functions and models.

Read the function form and the context before choosing a graphing or modeling method.

Key formulas

$$m = \frac{y_2 - y_1}{x_2 - x_1}$$

vertex of $y = a(x - h)^2 + k$: (h, k)

$$\text{average rate} = \frac{f(b) - f(a)}{b - a}$$
