

Symbols

	such that	a_n	n th element of a sequence
$\in$	is an element of	π	pi
$\emptyset$ or $\{ \}$	null or empty set	σ	standard deviation of a population
$\subset$	is a proper subset of	S_n	the sum of the first n terms of a series
$\subseteq$	is a subset of	$\sum_{i=1}^n a_i$	the sum from 1 to n of a_i
$\cap$	intersection	$n!$	factorial of a nonnegative integer n
$\cup$	union	$\bar{x}$	sample mean
$-a$	the opposite of a	$\approx$	is approximately equal to
∞	infinity	$=$	is equal to
$\sqrt{}$	radical sign; the principal square root	$\neq$	is not equal to
$\sqrt[n]{x}$	n th root of x	$<$	is less than
i	imaginary unit	$>$	is greater than
$\mathbb{N}$	the set of natural numbers	$\leq$	is less than or equal to
$\mathbb{Z}$	the set of integers	$\geq$	is greater than or equal to
$\mathbb{Q}$	the set of rational numbers	$f(x)$	f is a function of x
$\mathbb{R}$	the set of real numbers	$[x]$	greatest integer function; floor function
$\mathbb{I}$	the set of irrational numbers	$\lceil x \rceil$	least integer function; ceiling function
$\mathbb{W}$	the set of whole numbers	$\text{nint}(x)$	nearest integer function; round function
$\mathbb{C}$	the set of complex numbers	$f \circ g$	the composition of function f with function g
e	base of the natural logarithm	f^{-1}	inverse of a function f
$\ln x$	logarithm with base e ; natural logarithm	$ x $	absolute value of x
$\log x$	logarithm with base 10	$\{ \dots \}$	description or list of all elements in a set; roster notation
$\log_b a$	log base b of a		

$\{x \mid \text{condition}\}$	the set of all x that satisfy the given condition; set-builder notation	$\perp$	is perpendicular to
$P(A)$	the probability of event A	$\therefore$	therefore
$P(A \mid B)$	the conditional probability of A given B	$\angle$	angle
ϕ	phi; the golden ratio	$\triangle$	triangle
$'$	prime	$\overleftrightarrow{AB}$	line AB
$^\circ$	degree	$\overline{AB}$	line segment AB
$\dots$	continues	$\overrightarrow{AB}$	ray AB
$\sim$	is similar to	$m\angle CAB$	measure of angle CAB
$\cong$	is congruent to	$\widehat{AB}$	arc AB
$\parallel$	is parallel to	$m\widehat{AB}$	measure of arc AB
